## DETAILED ACTION

### *Response to Amendment*

The amendment filed on July 21, 2004 noted the Office Action mailed May 28, 2004 addressed claims 1-18 which were cancelled under a preliminary amendment filed January 22, 2004, accordingly this action is considered the first action regarding claims 19-25 filed in the preliminary amendment.

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claim 19, drawn to longitudinal profile processed by a milling tool, classified in class 409, subclass 131.
- Group II. Claims 20-25, drawn to boards having a tongue and groove joint, classified in class 144, subclass 354.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are related as separate combinations. As noted above, the invention of Group I is drawn to a profile that is processed via a milling and broaching tool. The invention of Group II is drawn to a board having a tongue and groove joint. The invention <sup>of</sup> Groups I and II have separate utility in the art and do not rely on each other for their operation, accordingly, the inventions of Groups I and II are separable and distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject

matter and their different search requirements, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
